

Öllöv Original – the rubber horseshoe

A Combination of Stability and Comfort. ÖLLÖV Original is a compounded horseshoe, made of a steel core covered with rubber. The steel provides stability to the hoof and makes the shoe easy to shape and nail. The rubber absorbs shock and vibration. This combination makes ÖLLÖV an outstanding horseshoe. ÖLLÖV provides a similar grip as the unshod hoof, and therefore promotes the natural gait of your horse. ÖLLÖV helps your horse move relaxed and safe. With comfortable shoes your horse will get motivated to work.

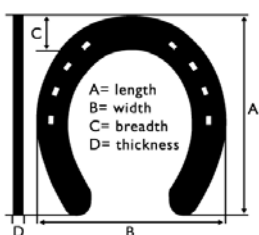

| Specification | | Packaging | |
|-------------------|-----------------------------------------|-------------------|-----------------------------------------|
| Material | Steel and rubber | Outside packaging | Rigid carton |
| Clips | Placed on the outside | Inside packaging | |
